Current Health Conditions

☐ Wellness Checkup? ☐Other:_____

If your child is experiencing a symptom, please describe it: _____

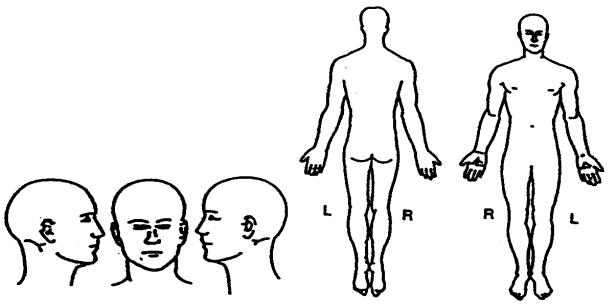
How long has it been a problem?_____ When is it worse?_____

Was there an injury or episode? (How did it start?) _____ Date:_____

How intense are your symptoms? (circle**)** **0 1 2 3 4 5 6 7 8 9 10**
No symptoms ***intense symptoms***

What does the pain feel like? (Check where appropriate)

- ☐ Numbness
- ☐ Dull
- ☐ Sharp
- ☐ Throbbing
- ☐ Tingling
- ☐ Aching
- ☐ Shooting
- ☐ Stabbing
- ☐ Stiffness
- ☐ Cramping
- ☐ Burning
- ☐ Swelling
- ☐ Other: _____



Circle location(s) of symptom on the body drawing

Does the pain radiate?_____ If so, Where to? _____

What makes your child's pain better?_____
(Examples: Over the counter medication, hot pack/cold pack, rest, exercise, sitting, standing, etc.)

What makes your child's pain worse?_____
(Examples: sitting, standing, exercise, computer work, walking, etc.)

What treatments has the child tried since suffering with this problem?_____
(Ice, Heat, Physical Therapy, Chiropractic, Massage, over the counter medication, prescription medication, etc.)

Please identify how your current condition effects your life. Place an "X" in the most appropriate box:

Condition	No Effect	Painful (Can Do)	Painful (Limits Activity)	Unable to Perform at all
Sit to stand				
Climbing Stairs				
Pet Care				
Extended Computer Use				
Household Chores				
Reading/Concentration				
Bathing				
Dressing				
Sleep				
Static Standing				
Static Sitting				
Walking				
Sports/Recreational Activities

Consent to Treat

You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as “informed consent” and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.

We may conduct some diagnostic or examination procedures if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable.

Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain in the joint, and improving neurological functioning and overall well-being.

It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms, burns and/or scarring from electrical stimulation and from hot or cold therapies, including but not limited to hot packs and ice, fractures (broken bones), disc injuries, strokes, dislocations, strains, and sprains. With respect to strokes, there is a rare but serious condition known as an “arterial dissection” that typically is caused by a tear in the inner layer of the artery that may cause the development of a thrombus (clot) with the potential to lead to a stroke. The best available scientific evidence supports the understanding that chiropractic adjustment does not cause a dissection in a normal, healthy artery. Disease processes, genetic disorders, medications, and vessel abnormalities may cause an artery to be more susceptible to dissection. Strokes caused by arterial dissections have been associated with over 72 everyday activities such as sneezing, driving, and playing tennis.

Arterial dissections occur in 3-4 of every 100,000 people whether they are receiving health care or not. Patients who experience this condition often, but not always, present to their medical doctor or chiropractor with neck pain and headache. Unfortunately a percentage of these patients will experience a stroke.

The reported association between chiropractic visits and stroke is exceedingly rare and is estimated to be related in one in one million to one in two million cervical adjustments. For comparison, the incidence of hospital admission attributed to aspirin use from major GI events of the entire (upper and lower) GI tract was 1219 events/ per one million persons/year and risk of death has been estimated as 104 per one million users.

It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. Likely, you have tried many of these approaches already. These options may include, but are not limited to: self-administered care, over-the-counter pain relievers, physical measures and rest, medical care with prescription drugs, physical therapy, bracing, injections, and surgery. Lastly, you have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.

I have read, or have had read to me, the above consent. I appreciate that it is not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.

Patient Name: _____

Parent or Guardian: _____ Signature: _____ Date: _____

Witness Name: _____ Signature: _____ Date:_____

Financial Policy

Most of our patients that have health or accident insurance will fall under one of the plans discussed in this policy. We ask that you read and understand our policy as it applies to your particular situation.

"ON THE JOB" INJURY (Workman's Compensation)
If you are injured on the job, your care should be paid for under your employer's Worker's Compensation insurance. You will need to inform your employer of the accident and obtain the name and address of the carrier of their insurance. If your employer does not provide us with this information, if a settlement has not been made within 3 months, or if you suspend or terminate care, any fees for services are due immediately.

PERSONAL INJURY OR AUTOMOBILE ACCIDENTS
Please notify your auto insurance carrier of your visit to our office immediately. Notify our insurance department immediately if an attorney is representing you. Although you are ultimately responsible for your bill, we will wait for settlement of your claim for up to 6 months after your care is completed. Once the claim is settled or if you suspend or terminate care, any fees for services are due immediately.

MEDICARE
We do accept assignment from Medicare. Our office completes and files the forms for Medicare at no cost.

SUBMITTING CHARGES TO INSURANCE
The providers Peak Family Chiropractic want to decide what care is in the best interest of each individual patient. For that reason, Peak Family Chiropractic and its providers are not a participating with your insurance company unless listed above. Under no circumstance will we submit claims to your insurance company for your care. If you would like to submit claims to your insurance, we will supply you a superbill upon request.

I have read and understand the payment policy of Peak Family Chiropractic.
